DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each publication. It has been placed in the application file, but the non-US-patent literature information referred to therein has not been considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant's specification lacks an adequate written description for the method of isolating the cells instantly claimed. The claimed cells are described only by a characteristic, i.e. being spore-like, without any known or disclosed correlation between that characteristic and the physical, chemical or biological nature of the cell, i.e. origin, cell-type, cell function, etc. Applicant's claimed characteristic is not a sufficient

identifying characteristic for written description purposes, even when accompanied by a method of obtaining the claimed cells. Further, it is unclear that there is a repeatable method for producing the spore-like cells because there is no adequate characterization of the cells.

Applicant has isolated some "spore-like" cells but the claims are generically drawn to isolating any and all "spore-like" cells (applicant theorizing that the cells are found throughout diverse animals and tissues). A generic statement . . . without more, is not an adequate written description of the genus because it does not distinguish the claimed genus from others, except by function." See *University of California v. Eli Lilly and co.* 119 F.3d 1559, 43 USPQ2d 1398 (1997).

To satisfy the written description requirement, a patent specification must describe the claimed invention in sufficient detail that one skilled in the art can reasonably conclude that the inventor had possession of the claimed invention. See, e.g., *Vas-Cath, Inc. v. Mahurkar*, 935 F.2d at 1563, 19 USPQ2d at 1116. >However, a showing of possession alone does not cure the lack of a written description. *Enzo Biochem, Inc. v. Gen-Probe, Inc.*, 296 F.3d 1316, 1330, 63 USPQ2d 1609, 1617 (Fed. Cir. 2002). Applicant is claiming the isolation of a new, distinct cell type (or form) however it is unclear that applicant has in fact isolated a new type of cells because the description is inadequate for comparison with the art.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are rendered indefinite because it is unclear what exactly spore-like cells are. The language of a claim must make it clear what subject matter the claim encompasses to adequately delineate its "metes and bounds". See, e.g., the following decisions: *In re Hammack*, 427 F.2d. 1378, 1382, 166 USPQ 204, 208 (CCPA 1970); *In re Venezia* 530 F.2d. 956, 958, 189 USPQ 149, 151 (CCPA 1976); *In re Goffe*, 526 F.2d. 1393, 1397, 188 USPQ 131, 135 (CCPA 1975); *In re Watson*, 517 F.2d. 465, 477, 186 USPQ 11, 20 (CCPA 1975); *In re Knowlton* 481 F.2d. 1357, 1366, 178 USPQ 486, 492 (CCPA 1973). The courts have also indicated that before claimed subject matter can properly be compared to the prior art, it is essential to know what the claims do in fact cover. See, e.g., the following decisions: *In re Steele*, 305 F.2d. 859, 134 USPQ 292 (CCPA 1962); *In re Moore* 439 F.2d. 1232, 169 USPQ 236 (CCPA 1969); *In re Merat*, 519 F.2d. 1390, 186 USPQ 471 (CCPA 1975).
